food1 = input("Enter a food: ")
food2 = input("Enter another food: ")
noun = input("Enter a noun: ")
place = input("Enter a place: ")
verb = input("Enter a verb: ")

print()

print(name + " was planning a dream vacation to " +
      place + ".")

print(name + " was especially looking forward to
      trying the local cuisine, including " + adjective1
      + " " + food1 + " and " + adjective2 + " " + food2
      + ".")

print(name + " will have to practice the language " +
      adverb + " to make it easier to " + verb + " with
      people.")

print(name + " has a long list of sights to see,
      including the " + noun + " museum and the blue
      park.")
```
